November 13, 2009

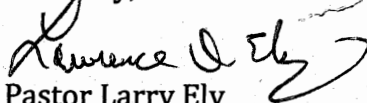

To Future Building Clients,

I highly recommend Contracting Solutions as an excellent & high quality construction company. They renovated two existing warehouse spaces in our church into an outstanding youth center and office area for our staff. They were professional, easy to work with, and exercised good leadership over the project. They communicated well. Their bid was competitive and accurate. They stuck to their timeline, met our budget, and genuinely cared about our project. We are very happy with our new building and would definitely use them again.

Our project was not easy. We had a bad experience with our architect and ended up with incorrect drawings. Contracting Solutions was willing to take on the project anyway and made many changes in the field to meet code and enhance our facility. They persevered through the challenges with me and were excellent advisors as we talked with the city, with inspectors, and got our project completed.

There are many intangible things that Pat & Mike did for us that were above and beyond what was required of them. Words cannot express my gratitude for their help and top-notch construction. After years of frustration and walking away from two other builders, Contracting Solutions was a refreshing change. Basically, they were great! They worked hard. They saved us money. They had good attitudes. They are men of integrity, and they delivered what was promised.

Sincerely,

Pastor Larry Ely
